features

2

IGO 50s working together to quickly and quietly create new urban transportation system.

Variable frequency drives provide a lower initial current rush and progressive speed change which can be supported by a smaller generator set than comparable cranes; jib folded back for 97 ft (29.6 m) radius operation for improved lifting capacities and obstacle avoidance.

Optional highway transport axle set SL122/J215M can travel at speeds up to 50 MPH (80 KPH) without the use of a trailer.

Flat outrigger pads easily stow on crane during transport.

Optional fixed height cab and access ladder allows operator to view the job site from a more advantageous position.

Igo 50

specifications

3

Jib

118 ft (36 m) radius standard bi-folding offsettable lattice jib. Two (2) tie bar lines with adjustable lengths allow jib to be offset 8° and 20°. Folds to 46 ft (13.9 m) radius or 97 ft (29.6 m) radius. Two (2) erecting speeds controlled from the remote, opening and aligning are carried out automatically by two (2) hydraulic cylinders.

*Optional Jib Extension

13 ft (4 m) removable jib extension allows maximum radius of 131 ft (40 m).

Mast

Galvanized folding mast with hydraulic cylinder for erection. Two (2) erecting speeds controlled from the remote. No locking necessary. 360° rotation possible during erection.

Chassis

Outriggers swing and lock into position. 14 ft 8 in (4.5 m) square outrigger spread with 8 ft 2 in (2.5 m) slewing radius. Level bubble integrated into the chassis. Outrigger pads are stowed on the crane during transport (21" x 16" [540 x 410 mm]). *Optional outrigger pads available at heights of 7.9 in (200 mm) and 15.7 in (400 mm).

Ballast

12,434 lb (5,640 kg) concrete ballast standard. Crane with standard ballast is able to be transported on several *axle sets. *Additional 50,265 lb (22,800 kg) concrete ballast optional.

*Optional Hydraulic Ballasting Derrick

Uses the hoisting winch to ballast the crane or dismantle/attach *fifth-wheel. Stows alongside the jib during transport.

Electrical Requirement

480 volt, 60 Hz measured at the turntable. Earth rod and electric cable stowed on the crane during transport.

Reeving

SM/DM block for 2 or 4-part line. One pin removal to change between SM and DM. Pure SM1 (section of hook block removed) is possible with gain of 220 lb (100 kg) lifting capacity.

Controls

Wireless remote control provides information to the operator about **wind speed, radius, hook height, load, and moment. Lights and buzzers alert the operator when nearing limits of operation.

Auxiliary remote attached by umbilical cord ensures continual operation in case of battery or other malfunction of the wireless remote control.

*Denotes optional equipment

*Optional Anemometer

Electronic wind speed meter to alert the operator of wind speed conditions. Provides selective display on the radio remote. Crane can be erected in wind speeds up to 25 MPH (40 KPH), operated in speeds up to 45 MPH (72 KPH) and weather vane in winds up to 93 MPH (150 KPH).

Swing

RVF+51 slewing mechanism with maximum swing speed of 0.8 RPM. Progressive control of speed with counter-slewing possible, anti-load swinging system makes aligning the load and jib easier. Multiple RPM speeds possible depending upon parameter selected.

Hoist

15 LVF 10 Optima: 15 HP variable frequency hoist with 1.1 Ust (1 t) line pull. 3 notch, progressive speed change according to the accelerating or decelerating ramps. Optima allows the hoist to adapt its speed to the weight of the load.

Trolley

3 DVF 5: 3 HP variable frequency hoist with 1,102 lb (500 kg) line pull. 2 notch winch, progressive speed change according to acceleration or deceleration ramps controlled by the frequency converter.

Hydraulic Equipment

Four (4) cylinders and two (2) pumps linked to solenoid valves. Two (2) cylinders for unfolding the jib, one (1) for slewing the derrick, and one (1) for raising the mast.

*Optional Transport Axle Sets

Axle sets are available for both jobsite and highway applications. Jobsite axles are rated at either 6 MPH (10 KPH) or 15.5 MPH (25 KPH); highway axle set is rated at 50 MPH (80 KPH).

*Optional Equipment

- * STANDARD NORTH AMERICAN SPECIFICATION: includes 13 ft (4 m) jib extension, hydraulic ballasting derrick, high sole plates, and Dialog Wind.
- * 13 ft (4 m) jib extension to reach maximum radius of 131 ft (40 m)
- * High outrigger pads (19" x 19" [500 x 500 mm] – 8" [200 mm] height)
- * Very high outrigger pads (19" x 19" [500 x 500 mm] – 16" [400 mm] height)
- * Fixed height cab and access ladder
- * Transport axles and kits
- * Top Zone
- * Top Tracing
- * Dialog Wind

Consult price list for additional options

**Requires optional anemometer

Warning Systems

Limit Moment Cut-Out – Prevents a moment that is more than +10%.

Warning

1. The operator must read and understand the owner's manual before operating this crane.
2. Positioning or operation of crane beyond areas shown is not intended or approved except where specified in owner's manual.
3. Practical working loads depend on supporting surface, wind, and other factors affecting stability such as hazardous surroundings, experience of personnel, and proper handling, all of which must be taken into account by the operator.

Igo 50

THIS CHART IS ONLY A GUIDE AND SHOULD NOT BE USED TO OPERATE THE CRANE. The individual crane's load chart, operating instructions and other instructional plates must be read and understood prior to operating the crane.
